FDH FINANCIAL HOLDINGS LIMITED
STATEMENT OF DIRECTORS' RESPONSIBILITIES
For the year ended 31 December 2013

The Companies Act, 1984, requires the directors to prepare financial statements for each financial year which give a true and fair view of the state of affairs of the group as at the end of the financial year and of the operating results for that year.

The Act also requires the directors to ensure the Group keeps proper accounting records which disclose with reasonable accuracy at any time the financial position of the Group and enable them to ensure that the financial statements comply with the Companies Act, 1984.

In preparing the financial statements the directors accept responsibility for the following:

- Maintenance of proper accounting records;
- Selection of suitable accounting policies and applying them consistently;
- Making judgements and estimates that are reasonable and prudent;
- Compliance with applicable accounting standards, when preparing financial statements; and
- Preparation of financial statements on a going concern basis unless it is inappropriate to presume that the Group will continue in business.

The directors also accept responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Group and to maintain adequate systems of internal controls to prevent and detect fraud and other irregularities.

The directors are of the opinion that the financial statements give a true and fair view of the state of the financial affairs of the Group and of its operating results.

**INDEPENDENT AUDITOR'S REPORT
TO THE MEMBERS OF
FDH FINANCIAL HOLDINGS LIMITED**

We have audited the consolidated annual financial statements and separate financial statements of FDH Financial Holdings Limited and its subsidiaries, which comprise the consolidated and separate statements of financial position as at 31 December 2013, and the consolidated and separate statements of comprehensive income, the consolidated and separate statements of changes in equity and consolidated and separate statements of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes, as set out on pages 5 to 50.

Directors' Responsibility for the Financial Statements

The company's directors are responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act, 1984 and for such internal control as the directors determine necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

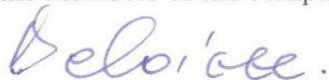

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, these financial statements give a true and fair view of the consolidated and separate financial position of FDH Financial Holdings Limited and its subsidiaries as at 31 December 2013, and its consolidated and separate financial performance and consolidated and separate cash flows for the year then ended in accordance with International Financial Reporting Standards, and the Companies Act, 1984, so far as concerns the members of the company.

1. General information

The Group comprises of the company and its four wholly owned subsidiaries: First Discount House Limited, a discount house registered under the Banking Act, 2011; FDH Bank Limited, a bank registered under the Banking Act, 2011; FDH Stockbrokers Limited, a company registered under the Securities Act, 2011 and FDH Bureau Limited, a company registered under the Banking Act, 2011. The holding company, which was incorporated in Malawi, is an investment company registered under the Companies Act, 1984. The company's registered office and principal place of business is Upper Ground Floor, Umoyo House, 8 Victoria Avenue North, P.O. Box 512, Blantyre, Malawi.

2. Adoption of new and revised International Financial Reporting Standards

2.1 Standards and Interpretations affecting amounts reported and/or disclosed in the financial statements

In the current year, the company has adopted those new and revised Standards and Interpretations issued by the International Accounting Standards Board and the International Financial Reporting Interpretations Committee of the International Accounting Standards Board that are relevant to its operations and are effective for annual reporting periods beginning on 1 January 2013.

The adoption of these new and revised Standards and Interpretations did not have a significant impact on the financial statements of the company (refer note 3.2).

2.2 Standards and Interpretations in issue, not yet effective

At the date of authorisation of these financial statements, the following relevant Standards and Interpretations were in issue but not yet effective:

Pronouncement	Issued	Effective date
<p><u>IFRS 2</u> <i>Share-based Payment</i></p> <ul style="list-style-type: none"> Amendments resulting from <i>Annual Improvements 2010-2012 Cycle</i> (definition of 'vesting condition') 	December 2013	Annual periods beginning on or after 1 July 2014
<p><u>IFRS 3</u> <i>Business Combinations</i></p> <ul style="list-style-type: none"> Amendments resulting from <i>Annual Improvements 2010-2012 Cycle</i> (accounting for contingent consideration) 	December 2013	Annual periods beginning on or after 1 July 2014
<ul style="list-style-type: none"> Amendments resulting from <i>Annual Improvements 2011-2013 Cycle</i> (scope exception for joint ventures) 	December 2013	Annual periods beginning on or after 1 July 2014
<p><u>IFRS 7</u> <i>Financial Instruments: Disclosures</i></p> <ul style="list-style-type: none"> Deferral of mandatory effective date of IFRS 9 and amendments to transition disclosures 	December 2011	Annual periods beginning on or after 1 January 2015 (The effective date of IFRS 9 was subsequently removed, see IFRS 9 below)

2. Adoption of new and revised International Financial Reporting Standards (Continued)

2.2 Standards and Interpretations in issue, not yet effective (Continued)

Pronouncement	Issued	Effective date
<u>IFRS 7</u> <i>Financial Instruments: Disclosures</i>		
<ul style="list-style-type: none"> Additional hedge accounting disclosures (and consequential amendments) resulting from the introduction of the hedge accounting chapter in IFRS 9 	November 2013	Applies when IFRS 9 is applied (At the time of issue of the revised version of IFRS 9 including the hedge accounting chapter, IFRS 9 had no stated mandatory effective date, see below)
<u>IFRS 8</u> <i>Operating Segments</i>		
<ul style="list-style-type: none"> Amendments resulting from <i>Annual Improvements 2010-2012 Cycle</i> (aggregation of segments, reconciliation of segment assets) 	December 2013	Annual periods beginning on or after 1 July 2014

2. Adoption of new and revised International Financial Reporting Standards (Continued)

2.2 Standards and Interpretations in issue, not yet effective (Continued)

Pronouncement	Issued	Effective date
<u>IAS 39</u> <i>Financial Instruments: Recognition and Measurement</i>		
• Amendments for novation of derivatives	June 2013	Annual periods beginning on or after 1 January 2014
<u>IAS 40</u> <i>Investment Property</i>		
• Amendments resulting from <i>Annual Improvements 2011-2013 Cycle</i> (interrelationship between IFRS 3 and IAS 40)	December 2013	Annual periods beginning on or after 1 July 2014

The directors anticipate that other than IFRS 9, these Standards and Interpretations in future periods will have no significant impact on the financial statements of the company. IFRS 9 will impact the measurement of financial instruments.

3. Significant accounting policies

Statement of compliance

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards.

Basis of preparation

The consolidated financial statements have been prepared on the historical cost basis, except for certain financial instruments which are disclosed at valuation. No other procedures are adopted to reflect the impact on the consolidated financial statements of specific price changes or changes in the general level of prices.

3. Accounting policies (Continued)

3.1 *Basis of consolidation*

The consolidated financial statements incorporate financial statements of FDH Holdings Limited and its 100% subsidiaries as outlined in note 1 above.

Subsidiaries

Subsidiaries are all entities controlled by the holding company or another subsidiary. Control is achieved when the company is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Specifically, the company controls an investee if and only if the company has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- Exposure, or rights, to variable returns from its involvement with the investee; and
- The ability to use its power over the investee to affect its returns.

When the company has less than a majority of the voting or similar rights of an investee, the company considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee;
- Rights arising from other contractual arrangements; and
- The company's voting rights and potential voting rights.

The company re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the company obtains control over the subsidiary and ceases when the company loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the statement of comprehensive income from the date the Group gains control until the date the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the parent of the company and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it:

- Derecognises the assets (including goodwill) and liabilities of the subsidiary;
- Derecognises the carrying amount of any non-controlling interests;
- Derecognises the cumulative translation differences recorded in equity;
- Recognises the fair value of the consideration received;
- Recognises the fair value of any investment retained;
- Recognises any surplus or deficit in profit or loss; and
- Reclassifies the parent's share of components previously recognised in OCI to profit or loss or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities.

3. Accounting policies (Continued)

3.2 *Amendments to IFRSs affecting amounts reported in the financial statements*

The following amendments to IFRSs applied in the current year have affected the disclosures reported in these financial statements. These include IFRS 10 *Consolidated Financial Statements*, IFRS 11 *Joint Arrangements*, IAS 19 *Employee Benefits* (Revised 2011), IFRS 13 *Fair Value Measurement* and amendments to IAS 1 *Presentation of Financial Statements*. In addition, the application of IFRS 12 *Disclosure of Interests in Other Entities* resulted in additional disclosures in the consolidated financial statements.

The nature and the impact of each new standards and amendments are described below:

IFRS 10 *Consolidated Financial Statements* and IAS 27 *Separate Financial Statements*

IFRS 10 “*Consolidated Financial Statements*” replaces parts of IAS 27 *Consolidated and separate financial statements* that deals with consolidated financial statements. Under IFRS 10 there is only one basis for consolidation that is control. In addition, IFRS 10, includes a new definition of control that contains three elements: (a) Power over an investee, (b) exposure or rights, to variable returns from its involvement with the investee, and (c) the ability to use its power over the investee to affect the amount of investor’s return. Extensive guidance has been added in IFRS 10 to deal with complex scenarios.

IFRS 12 *Disclosure of Interests in Other Entities*

IFRS 12 sets out the requirements for disclosures relating to an entity’s interests in subsidiaries, joint arrangements, associates and structured entities. The requirements in IFRS 12 are more comprehensive than the previously existing disclosure requirements for subsidiaries. For example, where a subsidiary is controlled with less than a majority of voting rights. While the Group has subsidiaries with material non-controlling interests, there are no unconsolidated structured entities. IFRS 12 disclosures are provided in Notes 6-10. IFRS 12.C2A states that the IFRS 12 disclosures need not be provided for periods beginning before the annual period immediately preceding the first annual period for which IFRS 12 is applied. The Group has opted not to avail this relief.

IFRS 13 *Fair Value Measurement*

IFRS 13 establishes a single source of guidance under IFRS for all fair value measurements. IFRS 13 does not change when an entity is required to use fair value, but rather provides guidance on how to measure fair value under IFRS. IFRS 13 defines fair value as an exit price. As a result of the guidance in IFRS 13, the Group re-assessed its policies for measuring fair values, in particular, its valuation inputs such as non-performance risk for fair value measurement of liabilities. IFRS 13 also requires additional disclosures.

Application of IFRS 13 has not materially impacted the fair value measurements of the Group. Additional disclosures where required, are provided in the individual notes relating to the assets and liabilities whose fair values were determined. Fair value hierarchy is provided in Note 11.

Several other amendments apply for the first time in 2013. However, they do not impact the annual consolidated financial statements of the Group. The following changes in IFRS have no effects on the Consolidated Financial statement and the separate financial statement:

- *Recoverable Amount Disclosures for Non-Financial Assets* – Amendments to IAS 36 *Impairment of Assets*
- IAS 19 *Employee Benefits* (Revised 2011)
- IAS 1 *Clarification of the requirement for comparative information* (Amendment)
- IAS 1 *Presentation of Items of Other Comprehensive Income* – Amendments to IAS 1
- IFRS 11 *Joint Arrangements* and IAS 28 *Investment in Associates and Joint Ventures*

3. Accounting policies (Continued)

3.3 Business combination

Acquisition of subsidiaries and businesses are accounted for using the purchase method. The cost of business combination is measured as the aggregate of the fair values (at the date of exchange) of assets given, liabilities incurred or assumed, and equity instruments issued by the group in exchange for control of the acquiree, plus any costs directly attributable to the business combination.

The acquiree's identified assets, liabilities and contingent liabilities that meet the conditions for recognition under IFRS 3 *Business combinations* are recognized at their fair values at the acquisition date, except for non-current assets (or disposal groups) that are classified as held for sale in accordance with IFRS 5 *Non-current assets held for sale and Discontinued Operations*, which are recognised and measured at fair value less costs to sell.

Goodwill arising from acquisition is recognised as an asset and initially measured at cost, being the excess of the cost of the business combination over the Group's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities recognised if, after reassessment, the Group's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities exceeds the cost of the business combination, the excess is recognised immediately in profit or loss.

3.4 Foreign Currencies

The consolidated financial statements are presented in Malawi Kwacha (rounded to the nearest thousand), the currency of the primary economic environment in which the Group operates and its functional currency.

In preparing the consolidated financial statements, transactions in currencies other than Malawi Kwacha (foreign currencies) are recorded at the rates of exchange prevailing on the dates of the transactions. At each statement of financial position date, monetary items denominated in foreign currencies are retranslated at the rates prevailing on the statement of financial position date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences arising on the settlement of monetary items, and on the retranslation of monetary items, are included in profit or loss for the period. Exchange differences arising on the retranslation of non-monetary items carried at fair value are included in profit or loss for the period except for differences arising on the retranslation of non-monetary items in respect of which gains and losses are recognised in other comprehensive income. For such non-monetary items, any exchange component of that gain or loss is also recognised directly in other comprehensive income.

3.5 Plant and equipment

Plant and equipment are stated at cost less accumulated depreciation and impairment losses.

Plant and equipment are depreciated on the straight-line basis at rates that will reduce book amounts to estimated residual values over the anticipated useful lives of the assets.

The assets' residual values, useful lives, and depreciation method are reviewed, and adjusted if appropriate, at each statement of financial position date.

Subsequent expenditure on an asset is capitalised only when it increases the future economic benefits embodied in an item of plant and equipment. All other expenditure is recognised in profit and loss as an expense as incurred.

3. Significant accounting policies (continued)

3.6 Intangible assets

Intangible assets are reported at cost less accumulated amortisation and impairment losses. Amortisation is charged on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each annual reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

3.7 Impairment of tangible and intangible assets excluding goodwill and financial assets

At each statement of financial position date, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash generating units, or otherwise they are allocated to the smallest group of cash generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

Where an impairment loss subsequently reverses, the carrying amount of the asset (cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (cash-generating unit) in prior periods. A reversal of an impairment loss is recognised immediately in profit or loss.

3.8 Financial instruments

The Group classifies its financial assets into the following categories: financial assets at fair value through profit or loss; loans and receivables; held-to-maturity investments; and available-for-sale financial assets. Management determines the classification of its investments at initial recognition.

i. Financial assets at fair value through profit or loss

This category has two sub-categories: financial assets held for trading, and those designated at fair value through profit or loss at inception.

A financial asset is classified in this category if acquired or incurred principally for the purpose of selling in the short term or if is part of a portfolio of identified financial investments that are managed together and for which there is evidence of a recent actual pattern of short term profit taking. Derivatives are also categorised as held for trading unless they are designated as hedges.

3. Significant accounting policies (continued)

3.8 *Financial instruments* (continued)

ii Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the Group provides money, goods or services directly to a debtor with no intention of trading the receivable.

iii Held-to-maturity

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Group's management has the positive intention and ability to hold to maturity. Were the Group to sell other than an insignificant amount of held-to-maturity assets, the entire category would be tainted and reclassified as available for sale.

iv Available-for-sale

Available-for-sale investments include those intended to be held for an indefinite period of time, which may be sold in response to needs for liquidity or changes in interest rates, exchange rates or equity prices.

“Regular way” purchases and sales of financial assets at fair value through profit or loss, held to maturity and available for sale are recognised on trade-date, the date on which the Group commits to purchase or sell the asset. Financial assets are initially recognised at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or where the Group has transferred substantially all risks and rewards of ownership.

Available-for-sale financial assets and financial assets at fair value through profit or loss are subsequently carried at fair value. Loans and receivables and held-to-maturity investments are carried at amortised cost using the effective interest rate method. Gains and losses arising from changes in the fair value of the ‘financial assets at fair value through profit or loss’ category are included in profit or loss in the period in which they arise. Gains and losses arising from changes in the fair value of available-for-sale financial assets are recognised directly in equity, until the financial asset is derecognised or impaired. At this time the cumulative gain or loss previously recognised in equity is recognised in profit or loss. However, interest calculated using the effective interest rate method and foreign currency gains and losses on monetary assets classified as available for sale are recognised in profit or loss. Dividends on available-for-sale equity instruments are recognised in profit or loss when the entity's right to receive payment is established.

3. Significant accounting policies (continued)

3.9 Impairment of financial assets

(a) Assets carried at amortised cost

The Group assesses at each statement of financial position date whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred if, and only if, there is objective evidence of impairment as a result of events that have an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. Objective evidence that a financial asset or group of assets is impaired includes observable data that comes to the attention of the Group about the following loss events:

- Significant financial difficulty of the issuer or obligor;
- A breach of contract, such as a default or delinquency in interest or principal payments;
- The Group granting to the borrower, for economic or legal reasons relating to the borrower's financial difficulty, a concession that the lender would not otherwise consider;
- It becoming probable that the borrower will enter bankruptcy or other financial reorganisation;
- The disappearance of an active market for that financial asset because of financial difficulties; and
- Observable data indicating that there is a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial assets in the group, including:
 - adverse changes in the payment status of borrowers in the group; and
 - national or local economic conditions that correlate with defaults on the assets in the group.

The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If the Group determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment.

3. Significant accounting policies (continued)

3.9 Impairment of financial assets (continued)

(a) Assets carried at amortised cost (continued)

If there is objective evidence that an impairment loss on loans and receivables or held-to-maturity investments carried at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in profit or loss. If a loan or held-to-maturity investment has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract. As a practical expedient, the Group may measure impairment on the basis of an instrument's fair value using an observable market price.

The calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable.

For the purposes of a collective evaluation of impairment, financial assets are grouped on the basis of similar credit risk characteristics (i.e. on the basis of the Group's grading process that considers asset type, industry, geographical location, collateral type, past-due status and other relevant factors). Those characteristics are relevant to the estimation of future cash flows for groups of such assets by being indicative of the debtors' ability to pay all amounts due according to the contractual terms of the assets being evaluated.

Future cash flows in a group of financial assets that are collectively evaluated for impairment are estimated on the basis of the contractual cash flows of the assets in the Group and historical loss experience for assets with credit risk characteristics similar to those in the Group. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the period on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not exist currently.

Estimates of changes in future cash flows for groups of assets should reflect and be consistent with changes in related observable data from period to period (for example, changes in unemployment rates, property prices, payment status, or other factors indicative of changes in the probability of losses in the Group and their magnitude). The methodology and assumptions used for estimating future cash flows are reviewed regularly by the Group to reduce any differences between loss estimates and actual loss experienced.

When a loan is uncollectable, it is written off against the related provision for loan impairment. Such loans are written off after all the necessary procedures have been completed and the amount of the loss has been determined. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss is reversed by adjusting the allowance account. The amount of the reversal is recognised in the statement of comprehensive income.

3. Significant accounting policies (Continued)

3.9 Impairment of financial assets (Continued)

(b) Assets carried at fair value

The Group assesses at each statement of financial position date whether there is objective evidence that a financial asset or a group of financial assets is impaired. In the case of equity investments classified as available-for-sale, a significant or prolonged decline in the fair value of the security below its cost is considered in determining whether the assets are impaired. If any such evidence exists for available-for-sale financial assets, the cumulative loss, measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in profit or loss – is removed from equity and recognised in profit or loss. Impairment losses recognised in profit or loss on equity instruments are not reversed through profit or loss. If, in a subsequent period, the fair value of a debt instrument classified as available for sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in the statement of comprehensive income, the impairment loss is reversed through the statement of comprehensive income.

3.10 Financial liabilities and equity

Financial liabilities and equity instruments issued by the Group are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument. An equity instrument is any contract that evidences a residual interest in the assets of the Group after deducting all of the liabilities. The accounting policies adopted for specific financial liabilities and equity instruments are set out below;

i. Liabilities to customers and financial institution

These are recognised initially at fair value, being their issue proceeds (fair value of consideration received) net of transaction costs incurred. They are subsequently stated at amortised cost; any difference between proceeds net of transaction costs and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest rate method.

i. Balances due to banks abroad

Balances due to banks abroad represent cash liabilities to correspondent banks and are carried at fair value on recognition and subsequently at amortised cost, using the effective interest rate method.

ii. Other payables

Other payables comprise letters of credit and sundry accruals which are carried at fair value on recognition and subsequently at amortised cost, using the effective interest rate method.

iii. Equity instruments

Equity instruments issued by the Company are recorded at the face value of proceeds received.

3. Significant accounting policies (Continued)

3.11 *Offsetting financial instruments*

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

3.12 *Sale and repurchase agreements*

Securities sold subject to repurchase agreements ('repos') are reclassified in the financial statements as pledged assets when the transferee has the right by contract or custom to sell or repledge the collateral; the counterparty liability is included in amounts due to other banks, deposits from banks, other deposits or deposits due to customers, as appropriate.

Securities purchased under agreements to resell ('reverse repos') are recorded as loans and advances to other banks or customers, as appropriate. The difference between sale and repurchase price is treated as interest and accrued over the life of the agreements using the effective interest rate method. Securities lent to counterparties are also retained in the consolidated financial statements.

3.13 *Cash and cash equivalents*

Cash and cash equivalents comprise treasury bills maturing within 3 months, cash balances and funds with Reserve Bank of Malawi and call deposits with other banks and discount houses, that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

3.14 *Other receivables*

Other receivables comprise prepayments and sundry non-trade receivables and are stated at their cost less impairment losses.

3.15 *Provisions*

Provisions are recognised when the Group has a present obligation (constructive or legal) as a result of a past event, and it is probable that the Group will be required to settle that obligation and a reliable estimate can be made of the amount of the obligation. Liabilities that do not meet these recognition criteria are disclosed in the financial statements as contingent liabilities.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the reporting date. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

3. Significant accounting policies (Continued)

3.16 *Assets classified as held for sale*

Assets are classified as held for sale if their carrying amount will be recovered through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as completed within one year from the date of classification.

Assets classified as held for sale are measured at the lower of the asset's previous carrying amount and fair value less costs to sell.

3.17 *Revenue recognition*

3.17.1 Interest income and expense

Interest income and expense are recognised in the statement of comprehensive income for all instruments measured at amortised cost using the effective interest rate method.

The effective interest rate method is a method of calculating the amortised cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Group estimates cash flows considering all contractual terms of the financial instrument (for example, prepayment options) but does not consider future credit losses. The calculation includes all fees and rewards paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Once a financial asset or a group of similar financial assets has been written down as a result of an impairment loss, interest income is recognised using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

3.17.2 Fees and commissions income

Fees and commissions are generally recognised on an accrual basis when the service has been provided. Loan commitment fees for loans that are likely to be drawn down are deferred (together with related direct costs) and recognised as an adjustment to the effective interest rate on the loan. Loan syndication fees are recognised as revenue when the syndication has been completed and the Group retained no part of the loan package for itself or retained a part at the same effective interest rate for the other participants. Commissions and fees arising from negotiating, or participating in the negotiation of, a transaction for a third party – such as the arrangement of the acquisition of shares or other securities or the purchase or sale of businesses – are recognised on completion of the underlying transaction.

3.17.3 Sale of foreign exchange

Revenue from the sale of foreign currency is recognized once the foreign currency cash or cheques are delivered and consideration received.

3.17.4 Other banking services

Revenue from the provision of other banking services is recognized once the related service is completed.

3. Significant accounting policies (Continued)

3.18 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

Current tax

The tax currently payable is based on taxable profit for the period. Taxable profit differs from profit as reported in the statement of comprehensive income because it excludes items of income or expense that are taxable or deductible in other periods and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the statement of financial position date.

Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the liability method.

Deferred tax liabilities are generally recognised for all taxable temporary differences.

Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and associates, and interests in joint ventures, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilise the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at each statement of financial position date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset realised. Deferred tax is charged or credited to the income statement, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.

3. Significant accounting policies (Continued)

3.19 Goodwill

Goodwill arising on the acquisition of a subsidiary represents the excess of the cost of acquisition over the Group's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities of the subsidiary recognised at the date of acquisition. Goodwill is initially recognised as an asset at cost and is subsequently measured at cost less accumulated impairment losses.

For the purpose of impairment testing, goodwill is allocated to each of the Group's cash generating units expected to benefit from synergies of the business combinations. Cash generating units to which goodwill has been allocated are tested for impairment annually or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than the carrying amount of the unit, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro-rata on the basis of the carrying amount of each asset in the unit. An impairment loss recognised for goodwill is not reversed in a subsequent period.

On disposal of a subsidiary the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

3.20 Retirement benefit costs

The Group operates a defined contribution retirement benefit plan. Contributions to the scheme are recognised as an expense when employees have rendered service entitling them to the contributions.

3.21 Earnings per share

The calculation of earnings per share is based on the profit for the year and the weighted average number of shares in issues throughout the year. Where new equity shares have been issued by way of capitalisation or subdivision, the profit is apportioned over the shares in issue after the capitalisation or subdivision and the corresponding figures for all earlier periods are adjusted accordingly.

4. Critical accounting judgments and key sources of estimation uncertainty

In the application of the Group's accounting policies described above (note 3) management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily available from other sources. The estimates and associated assumptions are based on historical experience and other factors that are relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which an estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

4.1 Critical judgments in applying the Group's accounting policies

Critical judgments made by the directors during the current period which would have a material impact on the consolidated financial statements relate to the recoverability of loans and advances to customers. The details of credit risk management policies are outlined in note 23 c below.

4. Critical accounting judgments and key sources of estimation uncertainty (Continued)

4.2 Key sources of estimation uncertainty

4.2.1 Impairment of goodwill

Determining whether goodwill is impaired requires an estimation of the value in use of the cash generating units to which goodwill has been allocated. The value in use calculation requires the directors to estimate the future cash flows expected to arise from the cash generating units and a suitable discount rate in order to calculate the present value.

4.2.2 Useful lives and residual values of plant and equipment

The Group reviews the estimated useful lives and residual values of plant and equipment at the end of each annual reporting period. These estimates are subjective by nature as they require assessment of financial and non-financial information in arriving at the residual values and useful lives which can only be borne out by future events.

4.2.3 Impairment losses on loans and advances

The Group reviews its loan portfolios to assess impairment, at least, on a quarterly basis. In determining whether an impairment loss should be recorded in the statement of comprehensive income, the Group makes judgements as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of loans before the decrease can be identified with an individual loan in that portfolio. This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in a group, or national or local economic conditions that correlate with defaults on assets in the group. Management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when scheduling its future cash flows.

The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

Key assumptions used:

- a) Cash flows arising from repayment agreement are aggregated over yearly intervals and assumed to arise at the end of the period;
- b) Where there is an agreement but no security in place and cash flows in the subsequent years are doubtful, total future estimated cash flows are assumed to be nil;
- c) Unsupported guarantees are assumed to result in nil cash flows;
- d) No cash flows are assumed to arise where there is no repayment agreement and no security and repayments are erratic or unpredictable; and
- e) Cash flows arising from security realisation have been assumed to arise at the end of the calendar year in which they are expected.

13. Goodwill (Group)

	<u>2013</u> K'000	<u>2012</u> K'000
<i>Cost</i>		
Balance at beginning and end of year	<u>131,784</u>	<u>131,784</u>

Goodwill arose in the business combination because the cost of the combination included a control premium. In addition, the consideration paid for the combination effectively included amounts in relation to the benefit of expected synergies, revenue growth, future market development and the assembled workforce of FDH Money Bureau Limited. These benefits are not recognised separately from goodwill as the future economic benefits arising from them cannot be reliably measured.

Annual test for impairment

Goodwill has been allocated for impairment testing purposes to the FDH Money Bureau Limited as a cash-generating unit. During the period, the Group assessed the recoverable amount of goodwill, and determined that goodwill associated with the cash generating unit's activities was not impaired. The recoverable amount of the relevant cash generating unit was assessed by reference to its value in use.

	Group		Company	
	<u>2013</u> K'000	<u>2012</u> K'000	<u>2013</u> K'000	<u>2012</u> K'000

16. Shareholder loan					
Shareholder loan	<u>1,675,000</u>	-	<u>500,000</u>	-	

The shareholder loan is in respect of borrowing from Old Mutual Life Assurance Company (Malawi) Limited (K1.175billion) and M Development Limited (K500 million), the shareholders of FDH Financial Holdings Limited. The borrowings are for recapitalising the Bank's operations to meet Basel II requirements, which are effective 1 January 2014. Interest on the loans is payable based on the simple average yield for the past six months for the 182 day Treasury bill (or its equivalent) as per Treasury Bill auction results plus 5%. The loans are secured by Treasury Bill notes and are repayable by 29th December 2017 on an amortising basis in half yearly installments, with a moratorium of one year.

22. Fair value measurements

This note provides information about how the Group determines fair values of various financial assets and financial liabilities.

22.1 Valuation techniques and assumptions applied for the purposes of measuring fair value

The directors consider that the carrying amounts of financial assets and financial liabilities recognised at amortised cost in the financial statements approximate their fair values

The fair values of financial assets and financial liabilities are determined as follows.

- The fair values of financial assets and financial liabilities with standard terms and conditions and traded on active liquid markets are determined with reference to quoted market prices.
- The fair values of other financial assets and financial liabilities (excluding derivative instruments) are determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices from observable current market transactions and dealer quotes for similar instruments.

22.2 Fair value measurements recognised in the statement of financial position

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

	<u>2013</u> K'000	<u>2012</u> K'000
<i>Financial assets at fair value through profit or loss</i>		
Non-derivative financial assets held for trading		
Level 1 (Currency Inventory)	102,570	96,175
Level 2 (Treasury Bills, Commercial Paper and Promissory Notes)	<u>5,694,975</u>	<u>3,352,207</u>
Total	<u>5,797,545</u>	<u>3,448,382</u>

22. Fair value measurements (Continued)

22.3 Fair value of the Group's financial assets and financial liabilities that are measured at fair value on a recurring basis

Some of the Group's financial assets and financial liabilities are measured at fair value at the end of each reporting period. The following table gives information about how the fair values of these financial assets and financial liabilities are determined (in particular, the valuation technique(s) and inputs used).

Financial assets/financial liabilities	Fair value as at		Fair value hierarchy	Valuation technique(s) and key input(s)
	31/12/2013	31/12/2012		
Currency Inventory	Asset – 102,570	Asset – 96,175	Level 1	Quoted Prices
Reserve Bank of Malawi Bills	Asset – 5,694,975	Asset – 3,352,088	Level 2	Amortised Cost

22.4 Fair value of financial assets and financial liabilities that are not measured at fair value on a recurring basis (but fair value disclosures are required)

Except as detailed in the following table, the directors consider that the carrying amounts of financial assets and financial liabilities recognised in the consolidated financial statements approximate their fair values.

	<u>31/12/2013</u>		<u>31/12/2012</u>

23. Financial risk management

a) *Introduction and overview*

The Group has exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risks
- Operational risks

This note presents information about the Group's exposure to each of the above risks, the Group's objectives, policies and processes for measuring and managing risk, and the Group's management of capital.

Risk measurement and control

The effective management of risk is critical to earnings and statement of financial position growth within the Group where the culture encourages sound commercial decision making which adequately balances risks and rewards.

23. Financial risk management (Continued)

a) Introduction and overview

Risk Management approach

The Group's approach to risk management is based on a well-established governance process and relies both on individual responsibility and collective oversight, supported by comprehensive reporting. This approach balances stringent corporate oversight with independent risk management structures within the business units.

Risk appetite and risk tolerance

Risk appetite is the quantum of risk the Group is willing to accept in the normal course of business in pursuit of its strategic and financial objectives. Risk taken within "appetite" may give rise to expected losses, but these should be covered by expected earnings.

Risk tolerance is an assessment of the maximum risk the Group is willing to sustain for short periods of time. It emphasises the "downside" of the risk distribution, and the Group's capacity to survive unexpected losses. The capacity to take unexpected losses depends on having sufficient capital and liquidity available to avoid insolvency. Risk tolerance typically provides a useful upper boundary for the Group's risk appetite.

The Group's board of directors has ultimate responsibility for risk management, which includes evaluating key risk areas and ensuring the process for risk management and systems of internal control are implemented. It has delegated its risk-related responsibilities primarily to three committees, the Risk Management Committee, the Audit Committee and the Remuneration Committee, with each committee focusing on different aspects of risk management.

Senior management in the Group is responsible for implementing strategies in a manner that limits risks associated with each strategy and that ensures compliance with rules and regulations, both on long term and day to day basis. Responsibility for the management of these risks is vested in the Group's Asset and Liability Committee (ALCO). The ALCO is responsible for formulating high-level risk policies, setting standards, monitoring concentrations and providing an independent review.

Risk Management

Naturally, the Group faces a number of risks when conducting its business which it may choose to take, transfer or mitigate.

b) Credit risk

Credit risk is the probability that a financial obligation will not be honoured by a counterparty and exists in lending and other trading activities. The risk covers both statement of financial position and off statement of financial position activities.

The Group mitigates credit risk by proactively managing it. Lending and other facilities are granted only if the level of risk is acceptable. This is achieved by thoroughly evaluating customers' credit worthiness before facilities are granted. Even after the facilities are granted, the Group continues to monitor customers' performance so that timely corrective action can be taken should circumstances demand. Various committees and structures are in place for sanctioning large facilities and monitoring customers' performances.

23. Financial risk management (Continued)

b) Credit risk (Continued)

Management of credit risk

The Board of Directors has delegated responsibility for the management of credit risk to its Credit Committee and is responsible for oversight of the credit risk, including:

- **Formulating credit policies** in consultation with business units, covering collateral requirements, credit assessment, risk grading and reporting, documentary and legal procedures, and compliance with regulatory and statutory requirements.
- **Establishing the authorisation structure** for approvals and renewals of credit facilities. Authorisation limits are provided to credit officers. Larger credit limits require approval by the head of credit department, the credit committee or the Board.
- **Reviewing and assessing credit risk.** The credit committee assesses all credit exposures and prepares a watch list which includes all those that have exceeded their limits and repayments are lagging behind.
- **Limiting concentrations of exposure** to counterparties, geographies and industries (for loans and advances), and by issuer, credit rating band, market liquidity and country (for investment securities).
- **Reviewing compliance** so that exposure limits remain within the acceptable range.
- **Providing advice, guidance and specialist skills** to business units to promote best practice throughout the Group in the management of credit risk.

The Group's principal financial assets are cash and balances with banks, treasury bills and other loans and advances and corporate lending. The Group's credit risk is primarily attributable to these assets. The credit risks on balances with banks and treasury bills are limited because the counterparties are institutions with high credit ratings.

Maximum exposure to credit risk without taking into account any collateral or other credit enhancements

The table below shows the maximum exposure to credit risk by class of financial instrument. Financial instruments include financial instruments defined and recognised under IAS 39 *Financial Instruments: Recognition and Measurement*. The maximum exposure is shown gross, before the effect of mitigation through the use of master netting and collateral agreements.

	<u>2013</u> K'000	<u>2012</u> K'000
Gross maximum exposure		
Funds with the Reserve Bank of Malawi	5,990,768	1,841,081
Funds with other banks	7,051,157	1,807,987
Malawi Government Treasury Bills and Bonds	8,066,647	5,285,576
Commercial Papers	2,050,717	1,048,917
Share investments held for trading	-	119
Receivables and prepayments	947,186	420,124
Bills on buybacks and loans	<u>16,883,514</u>	<u>16,951,984</u>
Total credit risk exposure	<u>40,989,989</u>	<u>27,355,788</u>

23. Financial risk management (Continued)

b) Credit risk (Continued)

Description of collateral held as security and other credit enhancements, in respect of the exposure through loans and advances above.

	<u>2013</u> K'000	<u>2012</u> K'000
Commercial property	1,882,500	4,129,000
Residential property	8,239,034	3,424,408
Cash deposits	225,057	171,054
Guarantees	250,000	281,000
Investments	15,247	12,870
Equipment and vehicles	<u>3,576,239</u>	<u>8,354,387</u>
Total	<u>14,188,077</u>	<u>16,372,719</u>

The Group's policy is to dispose of repossessed properties in an orderly fashion. The proceeds are used to reduce or repay the outstanding loans.

Net exposure to credit risk without taking into account any collateral or other credit enhancements

In respect of certain financial assets, the Group has legally enforceable rights to offset them with financial liabilities. However, in normal circumstances, there would be no intention of settling net, or of realising the financial assets and settling the financial liabilities simultaneously. Consequently, the financial assets are not offset against the respective financial liabilities for financial reporting purposes. However, the exposure to credit risk relating to the respective financial assets is currently not mitigated by any asset offset arrangements.

The Group monitors concentrations of credit risk by sector. An analysis of concentrations of credit risk at the reporting date is shown below:

Loans and advances to customers

Segmental analysis-Industry

Agriculture	1,888,422	2,003,377
Construction	831,460	723,445
Finance, real estate and other business services	2,657,541	2,202,357
Transport, storage and communications	1,937,579	3,020,675
Individuals	1,858,571	2,034,412
Manufacturing	1,452,327	962,273
Other services	<u>3,468,016</u>	<u>2,093,984</u>
	<u>14,093,916</u>	<u>13,040,523</u>

The risk that counterparties to trading instruments might default on their obligations is monitored on an on-going basis. In monitoring credit risk exposure, consideration is given to trading instruments with a positive fair value and the volatility of the fair value of trading instruments.

To manage the level of credit risk, the Group deals with counter-parties of good credit standing, and when appropriate, obtains collateral.

23. Financial risk management (Continued)

c) **Liquidity risk**

Liquidity risk arises where the operations of the Group cannot be funded due to mismatches in the cash flows of assets and liabilities within the statement of financial position. The Asset and Liability Committee reviews the potential for these mismatches and takes measures to alter certain maturity profiles where necessary with a view to minimising the impact of such mismatches.

Management of Liquidity risk

The Group has access to a diverse funding base. Funds are raised mainly from deposits and shareholders. This enhances funding flexibility, limits dependence on any one source of funds and generally lowers the cost of funds. The Group strives to maintain a balance between continuity of funding and flexibility through the use of liabilities with a range of maturities. The Group continually assesses liquidity risk by identifying and monitoring changes in funding required to meeting business objectives. In addition the Group holds a portfolio of liquid assets as part of its liquidity risk management strategy. The table below analyses assets and liabilities into relevant maturity profiles based on the remaining period at 31 December 2013 to the contractual maturity date.

	Less than 1 month K'000	1 - 3 months K'000	3 - 12 months K'000	Over 1 year K'000	Total K'000	Carrying amount K'000

Contractual liquidity mismatch	(11,662,997)	492,104	6,114,657	14,354,083	9,297,847	800,846
Cumulative liquidity mismatch	(11,662,997)	(11,170,893)	(5,056,236)	9,297,847	9,297,847	800,846

The contractual liquidity mismatch shows the mismatch before any adjustments are made for product and customer behavioural assumptions. The Group's Asset and Liability Committee (ALCO) manages this mismatch by setting guidelines and limits for anticipated liquidity gaps and monitors these gaps daily. The committee reviews the product and customer behavioural assumptions when there is indication that there is a shift in one or more of the variables.

23. Financial risk management (Continued)

d) Market risk

Market risk is the risk that changes in market prices, such as interest rates, foreign exchange rates and credit spreads will affect the Group's income or the value of holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return on risk.

Management of market risks

Overall authority for market risk management is vested in the ALCO.

Interest rate risks

The Group is exposed to interest rate risk as the entity trades in government securities and also borrows from other money market players to settle trading positions. The risk is managed by maintaining an appropriate mix of instruments and maturities. Trading activities are evaluated regularly to align with interest rate projections. Optimal trading strategies are applied, by either positioning the statement of financial position or protecting interest expenses through different interest rate cycles.

The Group's exposures to interest rates on financial assets and financial liabilities are detailed in the table below.

	Weighted average effective interest rate %	Less than 1 month K'000	1 - 3 months K'000	3 - 12 months K'000	Over 1 year K'000	Total K'000	Carrying amount K'000

e) Operational risks

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the Group's processes, personnel, technology and infrastructure, and from external factors other than credit, market and liquidity risks such as those arising from legal and regulatory requirements and generally accepted standards of corporate behaviour. Operational risks arise from all of the Group's operations and are faced by all business entities.

The Group's objective is to manage operational risk so as to balance the avoidance of financial losses and damage to the group's reputation with overall cost effectiveness and to avoid control procedures that restrict initiative and creativity.

The Group has an internal audit department with the mandate of conducting audits to provide independent assurance on the adequacy and effectiveness of the management of operational risk, including, but not limited to, the processes, systems and controls.

f) Compliance risk

This refers to the risk of non-compliance with any statutory requirements of central or local government, including regulations imposed by the Reserve Bank of Malawi and other regulatory bodies.

The management of compliance risk is a distinct discipline within the Group's overall risk management framework. Ultimate responsibility for this risk lies with the Board of Directors. A combination of key activities are undertaken to manage the risk such as identifying the regulatory environment and developing compliance management plans, training staff and other stakeholders on relevant regulatory requirements, and monitoring compliance.

The Group is subject to extensive supervisory and regulatory regimes, and the executive management remains responsible for overseeing the management of the Group's compliance risk.

Statutory requirements for banks

In accordance with Section 38 of the Banking Act, 2009, the Reserve Bank of Malawi has established the following requirements as at the statement of financial position date:

Liquidity reserve requirement

A bank is required to maintain a liquidity reserve with the Reserve Bank of Malawi equivalent to no less than 15.5% (2012: 15.5%) of total customer deposits. At the end of the year the Group's banking unit, FDH Bank Limited had liquidity reserves equivalent to 15.5% of customer deposits.

Subsequent events

Effective 1 January 2014, the Reserve Bank of Malawi strengthen the Liquidity Reserve Ratio (LRR) instruments by changing its composition. In this regards, while the LRR will be maintained at 15.5%, vault cash will no longer count as part of LRR. And eligible financial institution will be required to maintain with the central bank a minimum of 12% of the revised composition of the LRR at all times.

The company's assessment after year end indicates that they will be fully compliant with the new requirements from the effective date.

Capital adequacy requirement as per Section 10(1) of the Banking Act, 2009

Capital adequacy requirements applicable to the group's banking unit are outlined in note 21 (g) below.

Prudential aspects of bank liquidity

As a complement to Section 38 of the Banking Act, 2009, the Reserve Bank of Malawi had issued the following guidelines on the management of liquidity as at the statement of financial position date:

- Liquidity Ratio I - Net liquidity (total liquid asset less suspense accounts in foreign currency) divided by total deposits must be at least 30%; and
- Liquidity Ratio II - Net liquidity (total liquid assets less suspense accounts in foreign currency and cheques in the course of collection) divided by total deposits must be at least 20%.

Liquidity Ratios

At the end of the period, FDH Bank's liquidity ratio I was 44.34% (2012:27.35 %) and liquidity ratio II was 44.34% (2012:27.35%).

Prudential requirements for discount houses in Malawi

The Reserve Bank of Malawi has issued the following guidelines in respect of discount houses:

(i) Borrowing liability ratio

As a measure to avoid over exposure, discount houses are required to maintain a reasonable level of borrowing relative to their capital base. The borrowing liability ratio states that call money plus borrowings should not exceed 30 times the capital base. As at 31 December 2013 First Discount House Limited borrowing liability ratio was 0.00 (2012:0.01) times.

(ii) Short-term asset ratio

The short-term nature of the liabilities of a discount house requires that its assets be predominantly liquid. This ratio requires the company to have at least 70% of its adjusted total assets (excluding property, plant and equipment) invested in short-term securities. As at 31 December 2013, the short-term asset ratio for First Discount House Limited was 100% (2012: 95%).

23. Financial risk management (Continued)

f) *Compliance risk* (Continued)

(iii) Reporting requirements

To ensure compliance with controlling ratios and also to monitor its activities in the money market, the Discount House submits daily, weekly and monthly reports to the Reserve Bank of Malawi.

g) *Capital management*

Reserve Bank of Malawi sets and monitors the capital requirements for banks. In implementing current capital requirements, Reserve Bank of Malawi requires banks to maintain a minimum ratio of 6% core (tier 1) capital and 10% of total (tier 2) capital to risk-weighted assets. The regulatory capital for the Group's banking unit is analysed as follows:-

- Tier I capital, which comprises ordinary share capital, share premium, retained profits from prior periods, share premiums, and 60% of after-tax profits in the current period-to-date, less any unconsolidated investment in financial companies; and
- Tier II capital, which also includes share revaluation reserves, investment revaluation reserve, property revaluation reserve and loan loss reserve.

The calculation of the above ratios is given below:-

	<u>2013</u> K'000	<u>2012</u> K'000
Tier 1 capital		
Share capital	249,000	249,000
Share premium	826,000	601,000
Preference shares	500,000	-
Retained earnings brought forward	1,263,572	519,602
Net income (60% of current period)	<u>12,062</u>	<u>616,782</u>
	<u>2,850,634</u>	<u>1,986,384</u>
Tier 2 capital		
Shareholder loan	1,175,000	-
Loan loss reserve	<u>-</u>	<u>-</u>
Total regulatory capital	<u>4,025,634</u>	<u>1,986,384</u>
Risk weighted assets	<u>21,516,244</u>	<u>18,263,226</u>
Capital ratio		
Total regulatory capital (tier 2) expressed as a percentage of total risk weighted assets	<u>18.71%</u>	<u>10.88%</u>
Total Tier 1 capital expressed as a percentage of total risk weighted assets	<u>13.25%</u>	<u>10.88%</u>

23. Financial risk management (Continued)

g) Capital management (Continued)

Subsequent events

Effective 1 January 2014, the Reserve Bank of Malawi has issued new capital requirements for Financial Institution under Basel II implementation guidelines. The Basel II implementation guidelines and related capital requirement directives have been issued to ensure capital adequacy of financial institutions.

- Tier 1 capital, which includes paid-up share capital, share premium, retained earnings, and other distributable reserves, has been set at a minimum of 10% of core capital and
- Tier 2 capitals, which includes share revaluation reserve, investment revaluation reserve, property revaluation reserve and non-distributable reserve, has been set at a minimum of 15% of capital.

The company's assessment and the results of the current year indicate that they will be fully compliant with the new requirements from the effective date.

Over and above the tier 1 and tier 2 ratios, the Reserve Bank of Malawi has also set new minimum share capital, share premium and retained earnings requirements. The sum of share capital, share premium must be at least K 1,640 million as at 1 January 2014 (2013: K 850 million (excluding retained earnings)) for all registered banks. FDH Bank complies with this regulatory requirement.

24. Exchange rates and inflation

The average of the period-end buying and selling rates of the foreign currencies most affecting the performance of the group are stated below, together with the increase in the National Consumer Price Index, which represents an official measure of inflation.

	<u>2013</u>	<u>2012</u>
Kwacha/GBP	718.23	559.07
Kwacha/Rand	42.64	41.80
Kwacha/US Dollar	433.82	336.14
Kwacha/Euro	600.53	460.84
Inflation rate (%) (December 2013)	<u>23.9</u>	<u>34.6</u>

As at 17 February 2014, the above noted rates had moved as follows:

Kwacha/GBP	70.09
Kwacha/Euro	582.10
Kwacha/US Dollar	423.51
Kwacha/Rand	40.54
Inflation rate (%) (December 2013)	<u>23.5</u>

25. Retirement benefit plans

The employees of the Group are members of a compulsory retirement benefit plan. The Group is required to contribute a specified percentage of payroll costs to the retirement benefit scheme to fund the benefits. The only obligation of the Group with respect to the retirement benefit plan is to make the specified contributions.

The total expense recognised in the income statement of K158.1(December 2012: K72.7m) represents contributions payable to the plan by the Group at rates specified in the rules of the plan. As at 31 December 2013, there was K21.5 million due in respect of the 2013 period that had not been paid over to the plan.

26. Contingent liabilities

	Group		Company	
	<u>2013</u>	<u>2012</u>	<u>2013</u>	<u>2012</u>
	K'000	K'000	K'000	K'000
Local guarantees and performance bonds	<u>350,200</u>	<u>224,663</u>	<u>-</u>	<u>-</u>

In the normal course of its business, the Group has issued guarantees in favour of third parties on behalf of their clients. These guarantees only give rise to a liability for the Bank in the event that the clients default on payment to the third parties. As a result, and after due assessment, these guarantees have not been recognised as liabilities at the year end.
